SUMMARY

Passionate UI Developer with 3 years of experience in building responsive and interactive web applications using React, Redux Toolkit, Axios, and advanced hooks like useState, useEffect, useContext, useRef, useMemo, and useCallback, with expertise in utilizing localStorage for state persistence. Proficient in JavaScript, TypeScript, RESTful APIs, HTML, CSS, SCSS, and Bootstrap. Experienced with Git, GitHub, Photoshop, Postman, and SSMS for version control, design, API testing, and backend support. Skilled in the full software development lifecycle and dedicated to delivering exceptional user experiences.

TECHNICAL SKILLS

- **Frontend:** React.js, Redux Toolkit, JavaScript, TypeScript, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap
 - **State Management:** Redux Toolkit, Context API
 - **API Integration:** RESTful APIs, Axios, Fetch, Postman
 - **React Hooks:** useState, useEffect, useContext, useRef, useMemo, useCallback
 - **Web APIs:** localStorage, sessionStorage, Fetch API
 - **Development Tools:** Git, GitHub, npm, Yarn, Webpack, VS Code, SSMS, PostgreSQL
-

WORK EXPERIENCE

Signant Health - Associate Operations Software Engineer

MAR 2023 - Present

- Worked as a Frontend Developer, contributing to UI development and enhancements.
- Developed and maintained React-based UI components to enhance application usability.
- Played a key role in over ten clinical projects, including **Manistee, Centessa, Renibus 007 & 007E, Xylocor, and BluesphereBio**, by delivering technical solutions and UI enhancements to support project success.
- Integrated RESTful APIs and handled state management using React and JavaScript.
- Implemented reusable React hooks and UI components, reducing development time.
- Managed SQL scripts, stored procedures, and views using SQL Server Management Studio (SSMS).
- Debugged and optimized frontend performance for a seamless user experience.
- Worked collaboratively with cross-functional teams, including designers, backend developers, and QA, to deliver high-quality applications.

Render Infotech - Frontend Developer

SEP 2021 - MAR 2023

- Developed and maintained responsive websites using HTML, CSS, Bootstrap, Tailwind, and JavaScript, ensuring cross-device compatibility.
 - Optimized website performance and functionality by fixing bugs, implementing enhancements, and improving page load speeds.
 - Debugged and resolved UI issues using browser developer tools.
 - Utilized browser developer tools like Firefox Inspector and Firebug to debug and troubleshoot live websites efficiently.
-

EDUCATION

Bachelor of Computer Science Engineering

PROJECTS

Weather Forecasting App - Live Demo

- Developed a weather forecasting app using React and Redux Toolkit Query, seamlessly integrating the OpenWeather Map API for real-time weather data retrieval.
- Implemented a dynamic search feature with auto-suggestions, allowing users to quickly find cities and view accurate weather conditions.
- Designed a responsive 5-day weather forecast, enabling users to explore detailed weather insights for upcoming days.
- Integrated interactive temperature and humidity charts using Chart.js to dynamically visualize weather trends.
- Optimized performance by implementing efficient API caching and state management with Redux Toolkit Query.
- Created reusable utilities and custom hooks for unit conversions (Unix timestamp to local time, Kelvin to Celsius).
- Developed an interactive UI, allowing users to toggle between different days and view hourly weather breakdowns.
- Implemented a theme toggle (light/dark mode) using localStorage, ensuring users' preferences persist across sessions.
- Ensured cross-device compatibility and mobile responsiveness using CSS media queries and SCSS mixins, delivering a seamless experience across smartphones, tablets, and desktops.

Influx - Live Demo

- Developed and optimized the brand dashboard, influencer profile, and landing page for [Social Influx](#).
- Built a responsive UI using React.js, SCSS, and CSS variables for a seamless user experience.
- Managed state efficiently with Redux Toolkit, using useSelector and useDispatch for dynamic data updates.
- Integrated RESTful APIs with Axios, ensuring smooth data fetching and form handling.
- Optimized performance by refactoring React components for better maintainability and efficiency.

Portfolio - Live Demo

- Designed and developed a responsive portfolio website using React.js, SCSS, and CSS variables for a clean and modern UI.
- Implemented a theme toggle (light/dark mode) using CSS variables, enhancing user experience and accessibility.
- Showcased a mini-projects list alongside professional projects, highlighting both individual and collaborative work.
- Featured a toolkit section displaying expertise in React.js, Redux Toolkit, Axios, SCSS, and other technologies.
- Ensured cross-device compatibility with a fully responsive design for seamless navigation on desktops and mobiles.
- Deployed on Netlify, providing fast loading speeds and reliable hosting.
